Education

2015 - 2016
Fanshawe College - IMS
Postgraduate Certificate in Interactive Media Specialist

2011 - 2015
Western University - MIT
Bachelor of Arts in Media, Information & Technoculture

2012 - 2015
Fanshawe College - IDP
Diploma in Interactive Media Design and Production

Experience

TruckLadders - Reactr (Fanshawe Research Team)
JANUARY 2016 - APRIL 2016
I was hired as the back-end developer to build the client a website to showcase his product as well as a Content Management System (CMS) for the client to edit the website with. I also helped with the front-end of the website by writing the JavaScript as well as the base build of the website.

RezGuide - Reactr (Fanshawe Research Team)
JUNE 2015 - DECEMBER 2015
My job was to fix errors with front-end and develop missing pages as well as re-build most of the functionality on the back-end. I cleaned up the project code to prepare for the project for launch.

Bob's Your Uncle
MAY 2014 - DECEMBER 2014
BYU needed me to remake their current email newsletter template so that it would not break on certain email clients. I managed to solve their problem and then was in charge of putting all of the e-mail newsletters together in English and French. I also worked with the Creative and Production team when they needed help creating web assets for various promotions. After my 4 month internship I was hired on to freelance during the school year.
